

In this challenge we are going to decrypt the http traffic using the master keys. Download the master keys. Open the pcap file using wireshark.

Step 1) Select the Edit and go to preferences.

Step 2) Select the TLS protocol and upload the master keys file.

Step 3) Now search for http packets in the search bar.

Step 4) Follow the http stream. You can see the flag in plain text. Refer to the below screenshot.
